2. Relationship to Published Report and Sherlock Verification

This addendum is issued by the Sherlock team as an official public supplement to the 2025.09 · Final Mellow Protocol Public Best Efforts Audit Contest Report (report ID 1757334246). It reflects Sherlock·s own review and verification of the engagement records and relevant audit materials.

The complete file list and repository above remain the applicable scope. The Audited Commit is c2d66f36333d9f29457399fa54ddc68079d7b0a9 and the Final Commit is 72f689f965e4ac1a4c2bcfb645a8b5416cf740c7. Sherlock confirms that it concluded its review and verified the recorded findings· status at the Final Commit.

3. Findings, Severity and Resolution Status

Sherlock confirms that it reviewed and verified all findings documented in the referenced public report, including their severity classifications and resolution statuses. The complete findings list and the recorded severity and resolution status of each finding are incorporated by reference to that report and remain applicable to the identified scope and commits.

4. Trust Assumptions

Sherlock confirms that it reviewed and verified the trust assumptions identified in the referenced public report, including any stated privileged roles, administrative dependencies and security assumptions. Those assumptions are incorporated by reference and remain applicable to the identified scope and commits.

5. No Additional Assurance

This addendum confirms Sherlock·s verification of the matters expressly identified above. It is not a new or comprehensive security audit, certification of security, or warranty that the reviewed software is free from vulnerabilities. It does not extend to later code changes or matters outside the original scope.
